MyTOUCH

MyTouch features amazing technology in that all of the touch-screen components are installed safely behind the glass, acrylic, or other surface. This allows people to engage the screen through the glass or other surface by touching the surface itself from the opposite side. MyTouch technology is connected to the computer with a standard USB cable.

Features:

- Dual and Multi-touch Functionality
- Interact Through Glass
- Multiple Operating Systems

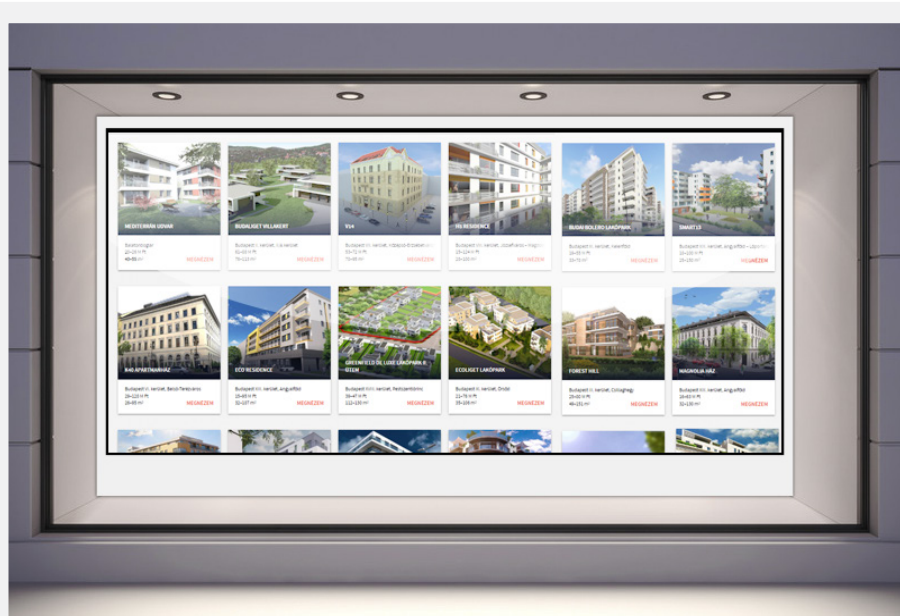

Customizable features:

Size, tail length, tail position, active area, and cut size.

- Output: USB 2.0 HID Device.
- Software compatibility: Windows, Mac, Linux
- Removable controller board.
- Sensitivity can be programmed to account for glass thickness - even to a gloved hand.
- Sensitivity through Double Glazing also possible
- Easy to clean

Technical Specification:

- (16:9) 17" - 100" Diagonal - Custom sizes available.
- No. of Touch Sensors (Resolution): 2,048
- Customizable Features
- Response Speed: Typically 18 - 50 ms
